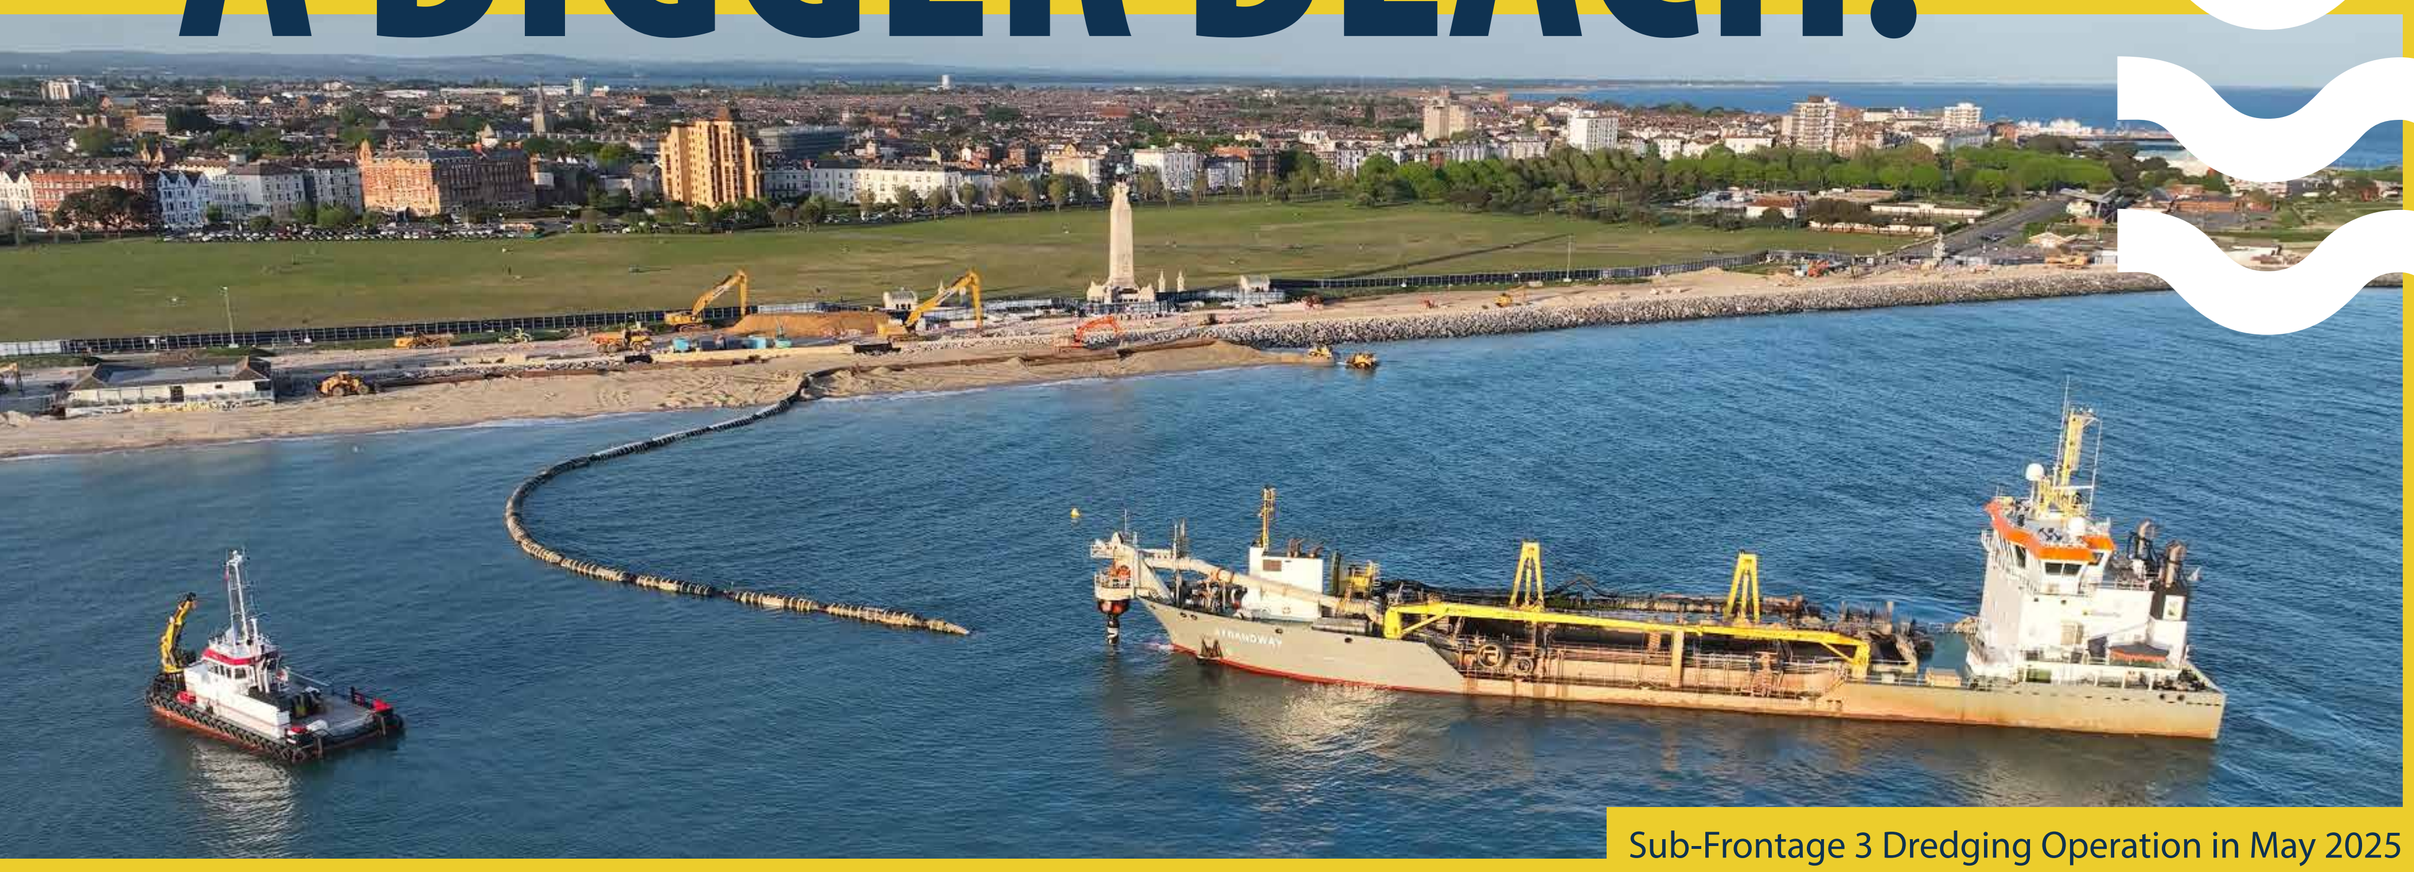
SOUTHSEA'S GETTING A BIGGER BEACH!



Sub-Frontage 3 Dredging Operation in May 2025

The beach between the Pyramids and the Coffee Cup café in Eastney will be rebuilt between October 2025 and March 2026. Beach material will be dredged locally from the Solent near the Isle of Wight and deposited onto the beach by a pipeline from the dredger. The dotted red line in the images shows the beach crest level before and after the material is deposited, showing how the width of the beach will double in the areas to the east and west of South Parade Pier. A smaller material dredging operation was recently undertaken on Sub-frontage 3 (Southsea Common).
