SUB-FRONTAGE 6
SOUTH PARADE PIER TO EASTNEY (ST GEORGE'S ROAD)

Between South Parade Pier and Canoe Lake, the stepped revetment and raised promenade that is constructed west of the Pier will be continued here. Terraced planters will again manage the level difference between the existing highway and raised promenade. The existing cycle lane arrangement will be changed, with a two-way cycle lane now running along the seaward edge of Eastney Esplanade, improving connectivity for cyclists.

Along the promenade there will be a suite of new seating, with some seating being incorporated into the sea defence itself. Grade II listed columns will be refurbished and new lighting installed. A new commercial platform will be constructed opposite Canoe Lake. This will provide new business opportunities, which are being managed by Portsmouth City Council.
